- Google Cybersecurity Professional
- Junior Web Exploitation Certified

## TECHNICAL SKILLS

Web Exploitation  
Vulnerability Assessment  
Penetration Testing  
OSINT & Reconnaissance  
Security Consulting  
Incident Monitoring

## CURRICULUM VITAE

# Security Specialist

## PROFESSIONAL SUMMARY

An Informatics Engineering student at Institut Teknologi Sumatera with a deep, driven passion for cybersecurity. I operate across the full security lifecycle — from proactive threat identification and hands-on vulnerability assessment to responsible disclosure and continuous system monitoring. My work spans both offensive and defensive disciplines, grounded in a commitment to building a safer digital landscape through rigorous methodology and ethical practice.

## EXPERIENCE

### Security Researcher

GOVERNMENT INSTITUTION · BUG DISCOVERY

- Conducted systematic vulnerability assessments on government web infrastructure, identifying critical attack surfaces.
- Executed responsible disclosure procedures, delivering detailed technical reports to institutional security teams.
- Performed manual penetration testing to validate findings and assess exploitability under real-world conditions.

### Web Exploitation Analyst

TARGET: TOKO-BUDI · AUTHORIZED ASSESSMENT

- Performed in-depth web application penetration testing, uncovering injection vectors and authentication flaws.
- Mapped the full attack surface through reconnaissance, parameter fuzzing, and automated scanning pipelines.
- Documented exploitation chains with proof-of-concept evidence and mitigation recommendations.

### Security Consultant

INDEPENDENT · ADVISORY & RISK ANALYSIS

- Advised stakeholders on risk posture by translating technical findings into actionable remediation roadmaps.
- Developed security awareness frameworks and assisted in hardening web-facing application components.

## EDUCATION

### B.Eng. Informatics Engineering

INSTITUT TEKNOLOGI SUMATERA (ITERA) · ACTIVE

Coursework spans operating systems, data structures, software engineering, and system security. Active involvement in cybersecurity research and practical lab work, bridging academic theory with real-world offensive and defensive security techniques.
